MICROPROCESSING AND MICROPROGRAMMING
VOLUME 34, NUMBERS 1–5, 1992

SPECIAL VOLUME: SHORT NOTES EUROMICRO 91

CONTENTS

Letter from the Short Note Editor, Euromicro 91 v

Session A5–Chairman: K. Klockner

J.G.M. Kroon
The software development environment at Rijkswaterstaat 3

M. Piechowcka and S. Szejko
An object-oriented kernel for distributed simulation of concurrent systems 7

M. Švéda
Microcontroller software engineering 11

P. Nieddu
A unifying approach to clientship, delegation and inheritance in object oriented languages 15

M. Buchanan and C. Britton
Formal specification and object-oriented design 19

M. Annunziata, S. Calabrese and R. Lorello
SIPA: An activity-planning system 23

M. Pfeiffer and R. Haggenmüller
System engineering with DOMINO and GRAPES 27

Session B5–Chairman: P. Milligan

J. Janećek
POLLUX: A language for distributed system programming 33

R. Lecordier and P. Martin
Data flow processors for automated visual inspection 37

Yoo S. Kim and Song C. Moon
Update synchronization pursuing site autonomy in heterogeneous distributed databases 41

J. Ringström, P. Fritzson and J. Fagerström
PREDULA–A multi-paradigm parallel programming and debugging environment 45

B. Jereb and L. Pipan
Measuring parallelism in algorithms 49

A.M. van Wezenbeek and W.J. Withagen
Adaptive window working set replacement policies 53

Session C5–Chairman: E. Fernandes

G.J.M. Smit, P.J.M. Havinga and P.G. Jansen
On the design of a dynamic reconfigurable network switch 59

Yong I. Yoon and Song C. Moon
Reliable transaction processing for real-time distributed database systems 63

A. Clematis and V. Gianuzzi
The conversation deadlock problem in client-server model 67

P. Milligan, R.K. McConnell, S.A. Rea and P.P. Sage
FortPort: An environment for the development of parallel Fortran programs 73

P. Milligan, S.A. Rea, R.K. McConnell and H.R.J. Walters
Parallel collocation modelling: A case study in developing efficient parallel codes 77

H.-R. Fonio and A. Pawlak
Rule-based synthesis using ADTs and term rewriting 81

J. Moran and S. Alexandres
A comparison of some processor farm architectures 85

J. Carrabina, J.C. Calderon, F. Lisa, C. Perez, F. Garrido, N. Avellana and E. Valderrama
Digital neural network system based in new concepts on the recall phase dynamics 89

D. Mozos, J. Septién, F. Tirado and R. Hermida
Design control in a high level synthesis system 93

V. Piuri and R. Stefanelli
Fault-tolerant techniques for VLSI tree structures 97

P. Pramanik, P.K. Das, A.K. Bandyopadhyay and D.Q.M. Fay
Avoidance of deadlock in loop structures–a two process solution 103

Session D5–Chairman: L. Mezzalira

P. Kroha and P. Fritzson
Software features of an extended single instruction machine 109

X. Fan
Queue-based primitives for a multithreaded architecture 113

J.D.M. McKeever, D.R.W. Holton and R.M. McKeag
Using transputers in a robot programming and control system 117

N.B. Šerbedžija
Parallel programming on a PC – A case study 121

J.M. Adán-Coello and M.F. Magalhães
STER's multilevel programming model for distributed hard real-time systems 125

A. Gandelli and V. Piuri
A highly-parallel system for real-time electronic measurements 129

Session E5–Chairman: F. Vajda

Gy. Ambrózy, I. Cseke, Z. Fazekas and S. Zöld
ARGUS–A PC based image processing workstation, its software and some application examples 135

S.L. Horianopoulos, D.E. Metafas, C.E. Goutis and T. Deliyannis
A VLSI synthesis tool for complementary output Delta Modulation FIR filters 139

E. Randon, P. Sánchez and E. Villar
ESP, a structure synthesis program 143

M. Dorigo
Using transputers to increase speed and flexibility of genetics-based machine learning systems 147

D. Sampsonidis and M. Zamani
An image analysis system for automatic measurements in solid state nuclear track detectors 153

G.P. Silva and J.S. Aude
Evaluation of a SPARC architecture with Harvard bus and branch target cache 157

Session F6–Chairman: Z. Blazek

Z. Blazek and I. Jelínek
Multiprocessor monitoring system 163

K. Ryu and S. Maeng
Specifying and inheriting concurrent objects 167

P. Brezany and V. Sipkova
Compiling a vector and array processing language for an associative processor 171

H. Wu, L.-E. Thorelli and A.-H. Smai
Flow control support for efficient realization of the EDA model 175

F. Mayer-Lindenberg
Interactive software development for complex embedded systems 179

J. Dabrowski
Efficient timing verification via mixed-mode technique 183

S.-C. Su and P. Biswas
A memory-mapped interprocessor communication architecture using FIFO RAMs 187

L. Gómez, A. Hernández and A. Núñez
Timing model for SDCFL digital circuits 193

M. Ojsteršek and V. Žumer
Improving a time critical task execution time using an IPRESPS 197

M. Tudruj
Multilayer reconfigurable transputer systems with distributed control of link connections 201

Session G5–Chairman: E. von Puttkamer

Gy. Bango, M. Gardos, J. Miskolczi, I. Szabo and I. Renyi
Design concepts and realization of the hardware structure of ARGUS image processing workstation 207

N. Bailey, A. Purvis, P.D. Manning and I. Bowler
Some observations on hierarchical, multiple-instruction-multiple-data computers 211

V. Polo, F. Fernández and A. Sánchez
Parallel implementation of local averaging for image processing 215

J. Carazo, S. Alexandres and J. Morán
Speech recognizer optimization and real-time implementation on a multitransputer array 219

E.S.T. Fernandes, C.F. Bornstein and C.M.D. Pereira
Parallel code generation for super-scalar architectures 223

F.M.B. Barbosa and E.S.T. Fernandes
Dispatching simultaneous instructions 227

P.A. Kokkinidis and C. Metaxaki-Kossionidou
An adaptive improvement of an image compression technique 231

Session H5–Chairman: S. Karkanis

H. Azaria, Y. Elovici and R.D. Hersch
Multiple Interfaces Message Passing System for transputer network 237

R. McConnell and J. Flanigan
A simple switching system for transputer links 243

F.J. Lopez-Aligue, M.I. Acevedo-Sotoca and M.A. Jaramillo-Moran
Multimicrocomputer implementation of three-dimensional neural networks 247

F.J. Vico and F. Sandoval
Neural networks definition algorithm 251
